

First steps toward simplifying with agents and **AI don't need to be tricky.**

Three rules we learned inside regulated UK businesses.

01.

Pick one task.

Choose a single job that eats admin time. **Leave the rest of the office alone for now.**

02.

Write down the boundaries.

Say what the AI colleague may do on its own, and **what always stops for a person to sign off.**

03.

Run a two week trial on live work.

Test it on real day to day work. Inspect every output. **Keep only what holds up.**

THE NEXT STEP

Start small. Protect the business.

Our free guide, **Adopting AI**, gives you all three rules in plain English. The link is in the first comment.

Which task eats most of your admin time each week? Tell us below.
